

## Training Visit Report - Cooper

Date: 10/31/19	Time of Visit: 10:00-11:00am
----------------	------------------------------

### Notes

Continued to work with Cooper to pay attention to handler when walking on a leash. Walked him outside with low distractions and also added “this way” when making an about turn and “let’s go” with continuing with the walk. Rewarded him checking in with me so it becomes a good thing to do so.

Cooper was very focused on our walk outside and I was able to see his reaction when we saw another dog (briefly as I turned and went down a different street).

### Instructions

Nice work that you are steering clear other dogs when you have him on a leash. This prevents him from having a chance to practice the behavior and breaks the pattern of his automatic reaction.
