

## Training Visit Report - Zola

Date: 1/23/20 Day 1	Time of Visit: 11:00 am
---------------------	-------------------------

### Notes

Session helped me to understand Zola better and what works best for her. Will not be using a Clicker – using the word “yes” and she is responding well. Worked on having her target my hand to familiarize her with the training method and setup for better recall. Spent last 10 minutes reinforcing her resting quietly on couch to calm her and leave in a relaxed atmosphere. She was very happy to stay on couch when I left.

Zola and I had a great working session. We went through all the cheese – thank you. You can freeze the hot dogs until we get to the recall work. I discovered today what works and doesn't work with her. She learned new behavior “touch”. She's fairly skeptical so I will be building trust with her.

### Instructions

It will be helpful if you can avoid letting her off leash still – you could use a long line so she can run. No need to do any training until after Transfer Session 1. Also reminder that she gets a lot of food so feed her less on training days if you don't want her to gain weight. Please let me know if you notice any change in energy after training and/or as a result of not getting off-leash runs.
